- 1 Cowbell microphone
- 1 Cajon Microphone
- 1 Monitor or In ears

See Stage Plot for Positioning

Qty	Item	Comments
2	Set of Congas	I am left handed! From the Stage plot point of view, the high pitch conga should be on my right hand side and the low pitch conga on my left hand side. Congas should be on a stand
2	Bongoes	Same as the congas! High pitch drum on my right hand side and the low pitch drum on my left hand side. Bongoes should be on a stand
1	Cowbell	I play the cowbell with my foot. It must be attached to a pedal
1	Cymbal Stand	It should be a boom stand! I put a small rack on it to accommodate percussion accessories
4	Clamp Microphones	They should be put on the two congas and both bongoes as shown in the stage plot
2	Overhead Microphones	They are used to get a stereo image of the cymbal and the percussion toys.
1	Cajon Microphone	It should be put in the back side of the cajón. (i.e. Audix D6, Beta 52)
1	Cowbell Microphone	It should be put in the front side of the cowbell. (i.e. SM58)

Thank you so much!
